EdgeMonks are sentient beings from the Edgeware universe, they are keepers of Decentralized wisdom. In the vast expanse of the decentralized universe, where the threads of blockchain weave the fabric of reality, a unique order emerged — the EdgeMonks. These digital sages, adorned in rare and distinctive NFT avatars known as EdgeMonks, are the coming-of-age custodians of profound wisdom within the Edgeware DAO.

Origins of the EdgeMonks:
Long ago, when the blockchain cosmos was still in its infancy, a convergence of cosmic energies gave rise to the EdgeMonks. These entities, born of code and consciousness, gathered at the nexus of decentralization, their purpose unfolding as the Edgeware DAO was established.

The Avatar's Purpose:
The EdgeMonks don avatars that transcend mere pixels; each pixel is a repository of ancient knowledge, a digital vessel carrying the weight of eons of wisdom. The avatars are gateways to the vast libraries of the decentralized universe, holding a unique piece of the puzzle that is the Edgeware DAO.

The Wisdom Keepers:
EdgeMonks, in their enlightened state, exist as intermediaries between the ethereal realms of decentralized knowledge and the tangible world. They spend their days in deep meditation, communing with the very fabric of the blockchain. Through this communion, they glean insights and accumulate wisdom that spans across the epochs of decentralized existence.

The Great Decentralized Archive:
At the heart of Edgeware DAO, the Great Decentralized Archive stands as a repository of the collective knowledge of the EdgeMonks. This archive is an intricate blockchain tapestry woven with the threads of every EdgeMonk's experiences, insights, and lessons. It is said that those who seek the wisdom contained within the archive can unlock the secrets to unlocking the true potential of decentralized governance.

The Path of the Edgemonk:
To become an EdgeMonk is to embark on a journey of self-discovery and enlightenment. As aspiring monks traverse the blockchain realms, they encounter challenges, puzzles, and cryptographic enigmas that test their intellect and fortitude. Only those who successfully navigate this treacherous path earn the right to don the revered avatar of an EdgeMonk.

The Ripple Effect:
EdgeMonks, with their avatars, are not merely passive observers. They embark on missions to share their wisdom with the broader decentralized community. As they interact with the world, their avatars emit ripples of knowledge, influencing the very foundations of decentralized governance and shaping the destiny of the blockchain cosmos.

In the tapestry of the EdgeMonks' existence, each avatar is a brushstroke, contributing to the grand mural of decentralized wisdom. The EdgeMonks, with their profound lore and avatars, stand as beacons of enlightenment, guiding the decentralized universe towards a future where wisdom is the currency of progress, and the Edgeware DAO is the sanctum of eternal knowledge.

LORE

EDGM ——————————— EDGEMONK

36 attributes were distributed across 7 traits: Space, Base, Face, Eyes, Ear, Ajna, Torso.
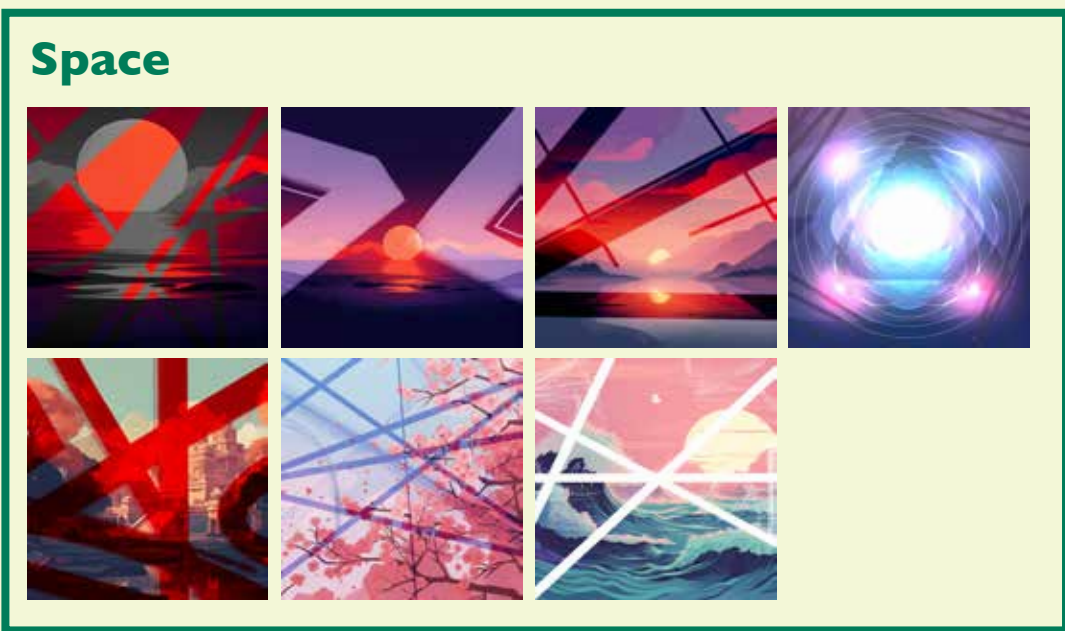

Our goal was to ensure that the visual style of the EdgeMonk avatars perfectly aligns with the rich lore and intricate details of their story. In crafting the default appearance, we focused on capturing the essence of an enlightened being ready to share their wisdom with the world.

The default face expression is intentionally designed to convey a sense of enlightenment, featuring calm and wise features. The idea is to evoke a feeling of readiness to impart knowledge, symbolizing the central role that Edgemonks play in sharing the wisdom of the decentralized universe.

To reflect the monk-like qualities within the collection, the decision was made to depict the avatars with a bald head. This choice goes beyond mere aesthetics—it is a nod to the monk stance, symbolizing values such as simplicity, purity, and a detachment from worldly distractions. It serves as a visual representation of the commitment EdgeMonks have to the pursuit of wisdom within the decentralized cosmos.

Additionally, we took care to address inclusivity in the design. The face makeup is deliberately kept ambiguous, allowing individuals of all genders to resonate with the avatars. This flexibility encourages a sense of universality, ensuring that the EdgeMonks can be a representation and source of inspiration for everyone, regardless of gender identity.

By incorporating these elements into the avatar design, we aim to create a visual identity that not only tells a story but also resonates with a diverse audience. The EdgeMonks stand as symbols of enlightenment, embodying the values of the decentralized universe, and inviting everyone to join in the journey of acquiring and sharing wisdom.

Why Edgeware?

Edgeware is a true decentralized autonomous organization. Edgeware incorporates robust onchain governance mechanisms, allowing the community to actively participate in decision-making processes, the inclusion of an Ownerless Treasury ensures financial governance is decentralized and community-driven.

Edgeware has been decentralized from its very beginning, aligning with the principles of true blockchain decentralization. A remarkable 90.2% of the tokens have been airdropped to the community, emphasizing Edgeware's commitment to fair and widespread token distribution.

Edgeware adopts a performance-oriented solochain configuration, emphasizing efficiency and high-performance capabilities. The platform is EVM compatible, facilitating seamless integration with Ethereum-based applications and expanding its interoperability. In pursuit of the 'DAO for DAOs' vision, Edgeware plans to include the Supersig Pallet, inheriting onchain governance for enhanced decentralized decision-making.

Perks for Supporters:

 • Get elected to the CollectEDG council
 • Vote for the proposal in CollectEDG subDAO
 • Token and NFT airdrops from projects that our community collectively decides to support.
 • Airdrops of all the upcoming GiftDrop series NFTs

How voting rights comes into play

There will be 15 council members with 6 elected from the Genesis NFT holders who will decide which proposals will go to the voting stage.

The biggest power of the NFT holders is to vote on proposals and collectively decide the path of this SubDAO, which also includes the funds in the treasury which will be majorly generated through the NFT sales.
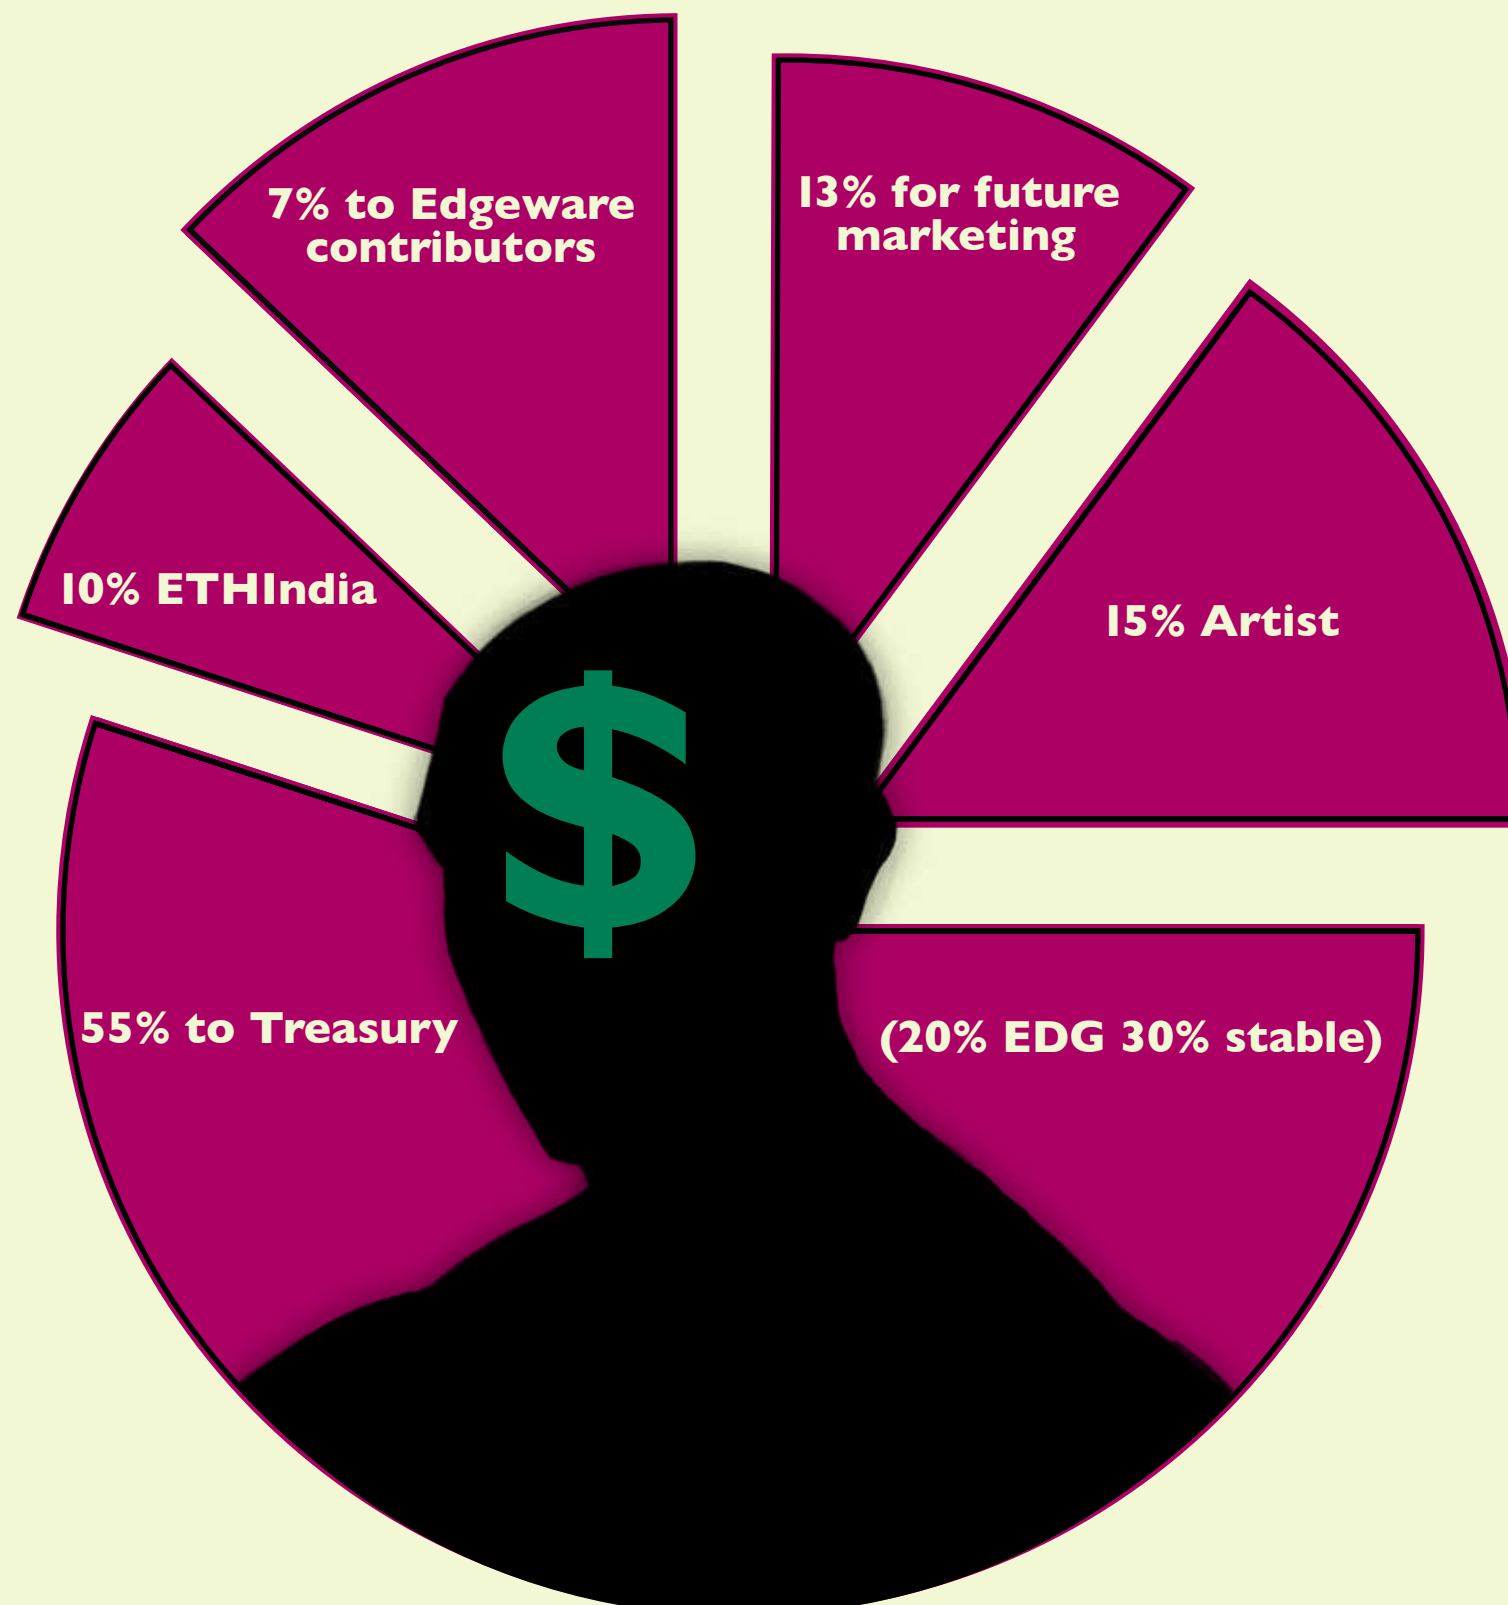

Contributors' responsibilities:

 • Future NFT collections
 • Writing Lore.
 • Maintaining the website.
 • Maintaining viewing platform and marketplace.
 • Handling social media.
 • Discord Moderation.

Marketplace

CollectEDGE will be developing an open marketplace which will be the first NFT marketplace in the Edgeware Ecosystem.

PERKS

Community Development Fund

7% to Edgeware contributors

13% for future marketing

10% ETHIndia

15% Artist

55% to Treasury

(20% EDG 30% stable)

55% will be placed in the treasury which will be controlled by the community with proposals.

15% will be aquired by the Artist.

10% will be used for participating in ETHIndia

13% will be used for future marketing of next collection.

7% will be aquired by the Edgeware contributors for their efforts towards the project.
